BCRA — Buenos Aires

Recent Research

Relationship Networks in Banking Around a Sovereign Default and Currency Crisis — 2020
with P. D'Erasmo, H. Moscoso Boedo and M. P. Olivero — IMF Economic Review

Export survival and foreign financing — 2020
with L. D'Amato and M. Tobal — BIS Working Papers

Panel Time Series Review of the Methodological Evolution — 2016
with T. Burdisso — Stata Journal

How do firms in Argentina get financing to export? — 2013
with T. Castagnino and L. D'Amato — European Central Bank

Software

HEATMAPGRAPH 2018
Stata module to measure the evolution of risks to financial stability over the financial cycle

XTCSI 2014
Stata module to investigate Residual Cross-Section Independence

XTCIPS 2014
Stata module to compute Pesaran Panel Unit Root Test in the Presence of Cross-section Dependence

PAYPER 2013
Stata module to compute the periodic payment and the entire schedule of a loan or annuity

FVFIX 2013
Stata module to compute the future value of a series of equal payments (cash flows)

DFSUMMARY 2013
Stata module to compute the Dickey-Fuller unit-root test for different lags

FVVAR 2013
Stata module to compute the future value of a series of payments (cash flows)

ROLLSTAT 2013
Stata module to compute rolling-window statistics for time series or panel data

PVFIX 2013
Stata module to compute the present value of a series of equal payments (cash flows)

IRR 2013
Stata module to calculate the (periodic) internal rate of return for a series of periodic cash flows

PVVAR 2013
Stata module to compute the present value of a series of payments (cash flows)
